DETAILED ACTION

Election/Restrictions

- 1. Claims 72-85 are withdrawn from further consideration pursuant to 37 CFR
- 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/12/2004.
- 2. Applicant's election without traverse of claims 86-116 in the reply filed on 10/12/2004 is acknowledged.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 88 and 93 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claim 88 recites the limitation "a certificate representing that the second apparatus is authenticated" in line 4. The claim further recites the limitation "certificate authenticates the first apparatus" in line 7. It is unclear which apparatus the certificate authenticates. Claim 93 has the same issue.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 09/504,070

Art Unit: 2134

7. Claims 86, 90, 91, 95, 96, 98-104, 108, 109, and 111-116, are rejected under 35 U.S.C. 102(b) as being anticipated by Menezes in Handbook of Applied Cryptography.

With regard to claims 86, 90, 91, 95, 96, 99-104, 108, 109, and 113-116, Menezes discloses passing a message from apparatus to apparatus can be authenticated as original by including a fingerprint identifying the original sender (pages 321-322).

With regard to claims 98, 111, and 112, Menezes discloses applying the hash to the data (pages 321-322)

8. Claims 87-89, 93, 94, 97, 105-107, and 110, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Menezes.

With regard to claims 87, 89, 97, and 110, Menezes discloses the original data circulation method, as outlined above, but does not disclose in the same embodiment that the information that is desirable to authenticate is a public key. Menezes discloses in another embodiment that it is desirable to authenticate public keys (page 559). It would have been obvious to one of ordinary skill in the art to conceal the public key with a fingerprint, so that it could be authenticated.

With regard to claims 88, 89, 93, 94, and 105-107, Menezes discloses using certificates to authenticate a public key bound to a message (page 559).

9. Claims 86, 87, 91, 92, 96, 97. 109, and 110 are rejected under 35 U.S.C. 102(b) as being anticipated by Caronni et al., US Patent number 5,822,434.

With regard to claims 87, 89, 97, and 110, Caronni discloses hashing a public key to prove message authenticity (column 5 lines 13-18).
